Types of Graphs

Different Types Of Graphs...

L.S.I.C.A. Data Analysis

1. List the data in order from least to greatest
2. Subtract the least datum from the greatest datum (RANGE)
3. Identify the most frequent occurring data (MODE)
4. Cross out the data on the ends until you find the middle number (MEDIAN)
5. Add them and divide by the number of data (MEAN)
